<b>Backup mail server</b>	<b>Yes</b>	<b>No</b>
<b>Additional remote FTP storage for backup and other purposes</b>	Yes	No
<b>Priority Support over budget hosting</b>	Yes	No

---

### BUSINESS FEATURES

---

Some of main feature of business accounts are listed below.

#### DEDICATED ACCOUNT REPRESENTATIVE

---

Every business account comes with a dedicated support representative who knows all about your account, No more waiting while we fetch up your account information.

#### MORE FREQUENT BACKUPS

---

Business accounts are backed up more frequently several times a day. While budget accounts are backed up once daily. In case of a possible crash a budget hosting will lose any updates in data for up to 24 hours, while in business hosting this will be just a few hours.

#### HIGH SPEED BUSINESS DEDICATED SERVERS

---

All business accounts are hosted on blazing fast servers dedicated for business clients only. This means less clients per server and high speeds.

#### BACKUP MAIL SERVER

---

Each business account comes with a backup mail server. Backup mail server ensures you will receive all the emails even if your primary mail server is down for some reason. All the emails will be received by Backup mail server while primary is down, and as long as primary mail server comes backup mail server transfers all emails received during down time to primary mail server. This ensures that you get all the email ever sent to your business.

#### ADDITIONAL REMOTE FTP STORAGE FOR BACKUP AND OTHER PURPOSES

---

Each business account comes with a special FTP storage account (on a server other than where your primary account is). You may use the FTP storage for backing up your own website data or use it any way you want.

#### PRIORITY SUPPORT OVER BUDGET HOSTING

---

Business clients always get priority and personalized support.
